Welcome to Quicken Personal Finances 2007

Thank you for choosing Quicken 2007 to help manage your finances! Each Quicken user has different financial goals, sources of income, and money management priorities. The beauty of Quicken is that it is powerful and flexible enough to help most people manage their finances better.

This book describes a simple and complete path to setting up Quicken in a way that provides just the information you care about. Use this chapter to learn how Quicken works and to decide how much detail you want from Quicken.

1

Decide how much detail you want to track

Some people use Quicken to manage only their chequing accounts, so they can keep track of their income and expenses. Others use Quicken primarily to download investment transactions from their brokerage (Quicken XG only) and make use of a wealth of analysis, research, and performance-tracking tools. Many people use Quicken to track all aspects of their financial lives, including income and expenses, investments (Quicken XG only), assets, and loans. It's up to you to decide how much detail you want to track.

If you want to	Refer to
Save time and effort with your regular banking and bill- paying chores; improve the accuracy of your record keeping; download transactions as they clear directly from your participating bank or credit card company; understand where your money goes.	Chapter 2, Manage your income and expenses, on page 7
Download transactions from your real-life online accounts into accounts you are already managing in Quicken.	Chapter 3, <i>Set up Online Banking</i> , on page 29
(Quicken XG only) Track the purchase price, change in market value, and performance of your retirement plan or investments; download investment transactions and holdings information directly from your broker; make informed investing decisions; reduce your tax liability; know what your stock options are worth.	Chapter 4, Manage your investments with Quicken XG, on page 35
Cut the time you spend each year preparing your tax return; minimize your tax bill.	Chapter 5, <i>Plan for tax time</i> , on page 51
Understand the overall state of your financial health.	Chapter 6, <i>Determine your net worth</i> , on page 61
Determine when you can retire; save money to send your kids to university; find out if you can afford to quit your job and stay home when the baby arrives.	Chapter 7, <i>Develop a long-term plan</i> , on page 71

Learn the essentials

Take a few minutes right now to familiarize yourself with some essential Quicken terms and concepts. You'll see these terms throughout this guide and while you're using Quicken.

Files

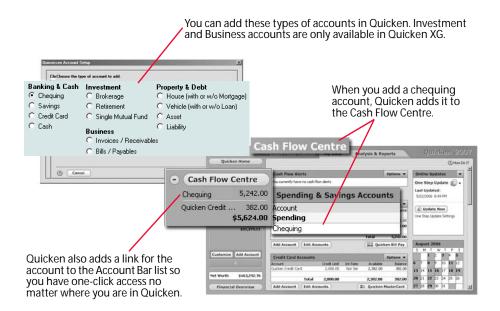

Quicken saves your financial information in a data file on your computer. As with other types of files, such as word-processing or spreadsheet files, you store this file in a folder on your computer's hard disk. Unlike most other programs, however, Quicken immediately saves your information as you work; you don't need to save the file manually. That said (as with any important information), you should still routinely back up your Quicken file to a removable source and store it somewhere safe. You'll learn how to back up your data in Chapter 2, Manage your income and expenses.

Accounts

Within a single Quicken file, you can add many accounts to organize your financial information. You can add several accounts (such as chequing, savings, brokerage (Quicken XG only), and so on), or you can start with a single account (such as a chequing account). You can also add Quicken accounts to track other aspects of your financial life, such as a home mortgage or a vehicle loan. You should set up all your Quicken accounts within a single Quicken file. That way, you can use Quicken to create reports that reflect your complete financial picture.

Initially, you may want to add only a chequing or liability account. Later, you can add additional accounts to track more of your financial activities. The types of accounts you can add are shown in the following illustration.

When you add any new account, Quicken groups it with all other accounts of the same type in one of three account centres, which are areas where you can view your data with pertinent tools. Quicken also displays every group of accounts together in a fourth centre, the Financial Overview Centre.

When you add a new chequing account, Quicken displays it on the Quicken Home page as well.

Cash Flow Centre and Home page

You'll find accounts for savings, chequing, and credits cards in the Cash Flow Centre. Use these accounts to better understand your overall financial status. These accounts are discussed in more detail in Chapter 2, Manage your income and expenses.

For a more focused view of your monthly spending, see the Quicken Home page. It displays just the chequing accounts that you deposit your money into and pay your bills from, as well as all of the deposits (such as your paycheque) and expenses (such as your mortgage) that you enter in to Quicken. This information can help you determine if you have enough money to cover your monthly expenses. The Quicken Home page is discussed in more detail in Chapter 2, Manage your income and expenses.

Investing Centre (Quicken XG only)

You'll find accounts for investments in the Investing Centre. Use these accounts to track the ongoing performance of your stocks and bonds, retirement funds, and other types of investments. These accounts are discussed in more detail in Chapter 4, Manage your investments with Quicken XG.

Property & Debt Centre

You'll find accounts for assets (what you own) and liabilities (what you owe) in the Property & Debt Centre. Use these accounts to track financial activities that affect your net worth. For example, using a house account lets you track the equity you're building and the loan you're paying down as you make your mortgage payments. These accounts are discussed in more detail in Chapter 6, Determine your net worth.

Financial Overview Centre

You'll find all your accounts displayed together on the Net Worth tab of the Financial Overview Centre. Use this tab to monitor the change in value of your finances over time, and to see the current allocation of your finances by account type. Net worth is discussed in more detail in Chapter 6, Determine your net worth.

Registers and transaction lists

Quicken displays transactions in a way that makes the most sense for each type of account.

Registers

Each noninvestment account in Quicken has a register. The register looks like a paper chequebook register, where you record cheques you've written and deposits you've made. The Quicken register even calculates your current balance for you.

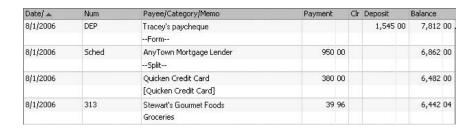

Transaction lists (Quicken XG only)

Each investment account in Quicken has a transaction list. The transaction list resembles a brokerage statement and is specifically designed to manage both the investing transactions and cash transactions for an account in the same place.

Transactions

Within each Quicken register, you enter individual transactions that correspond to your real-world income and expenses. For example, you could enter cheque number 313 for \$39.96 to Stewart's Gourmet Foods as a payment transaction in your chequing account. Similarly, you would enter your paycheque as a *deposit* transaction in the same account.

If you bank online, you can download your transactions directly into the register, so you don't have to enter them manually. You'll learn how in Chapter 2.

Categories

To get the most out of Quicken, you should assign one or more *categories* to each transaction. Categories track the source of a deposit (Salary), the reason for an expenditure (Utilities), or the name of the account to which you're transferring funds (Savings).

If you're interested in managing your money in any detail (and getting the most from Quicken reports), you should use categories. You'll learn more in Chapter 2.

Get the most from this book

As you read this book, use your own financial data to learn basic but powerful Quicken features. After you complete the tasks in a chapter, you will be able to use Quicken immediately to help achieve your personal financial goals.

Each chapter builds on the chapters that come before. Before you begin working through a chapter, make sure you've performed all the tasks and gathered all the recommended materials listed in "Before you start" and "What you will need" at the beginning of the chapter.

The last page of each chapter contains a list of more advanced features. With the assistance of the extensive Quicken Help system, you can work at your own pace to learn about these features when you're ready to use them.

Review your cash flow accounts 15
Update your cash flow accounts 20
Reconcile your cash flow accounts 25
Back up your data file 27
Next steps 28

Before you start

Think about the accounts you want to track in Quicken. This chapter discusses chequing and savings accounts, as well as cash and credit card accounts.

What you will need

If you want Quicken to help you add accounts by downloading account and transaction information, you should register Quicken. (Choose Help menu > Register Quicken. If you don't see Register Quicken on the Help menu, you've already registered.) If you want to add accounts manually, you will need your most recent statements for the chequing, savings, and credit card accounts you plan to track with Quicken.

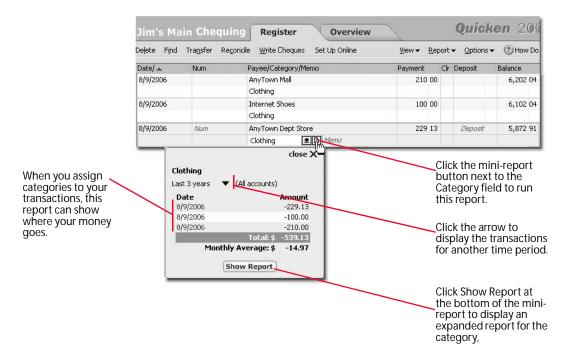

Learn how categories help manage your finances

Before you begin managing your income and expenses in Quicken, you should understand how Quicken tracks financial information. As mentioned on page 6, the key to money management in Quicken is categories.

Categories are labels that track how much you're spending on particular types of items, such as rent, groceries, or dining. For example, you might use the Clothing category with the following transactions:

- A cheque for \$229.13 for a new jacket
- A credit card purchase of \$100.00 for some mail-order boots
- A few cash purchases for new school clothes for the kids, totalling \$210.00

Because these transactions use the same category, it's easy to produce a mini-report for the Clothing category like the one shown below. And if you want to see how much you've spent on clothing in greater detail, just click the Show Report button at the bottom of the mini-report.

Make it a habit to use categories with all your transactions. The first time you download a transaction or enter a transaction with a payee, you may need to change or assign a category. But after you do, Quicken remembers this information and automatically fills it in for you the next time you download or enter a transaction for that payee. And if you want to change the category for some reason, it's easy to do.

While mini-reports are a fast and easy way to get information about a single category, sometimes what you need is information about several categories at one time. You'll learn how to get this information in "Get answers with Quicken reports and graphs" on page 18. But first you'll need to set up the accounts you want to track.

Decide which accounts to track

If you want to track your overall income, spending, and saving habits, you need to add more than one Quicken account. Use the following guidelines to help you decide which cash flow accounts to add. (Remember, you should add all these accounts in a single data file.)

Chequing

This is the most commonly used Quicken account. Start with the account into which you deposit your paycheque and from which you pay most of your bills and make tax-related expenditures (such as charitable donations and mortgage interest).

Use this account type for standard savings accounts, such as those available at most banks or credit unions.

Credit card

Many people track one or more credit cards in Quicken. Start with the one you use most often. For information about the easiest card to use with Quicken, see "Add a credit card account online" on page 11.

Adding accounts to Quicken to track your credit cards enables you to download and categorize your transactions, which can give you great insight into how you're spending your money. If you aren't interested in tracking this level of detail and simply want to track how much you pay toward your credit cards each month, you can track your credit cards as bills instead. How you'll review the information for each option is discussed in more detail in "Review your cash flow accounts" on page 15. For more information about deciding how to track credit cards in Quicken, choose Help menu > Quicken Help, click the Index tab, enter credit cards, and select How do I decide how to track credit cards in Quicken.

Cash

If you want to know where all your money goes, including the cash you carry with you, you can add a separate account to track cash. A simpler way is just to use the Cash category, and then assign it to Interact/ATM transactions and other cash withdrawals in your chequing account register. If you do set up a separate account for cash transactions, save yourself some time and track only to the nearest dollar.

Add your cash flow accounts

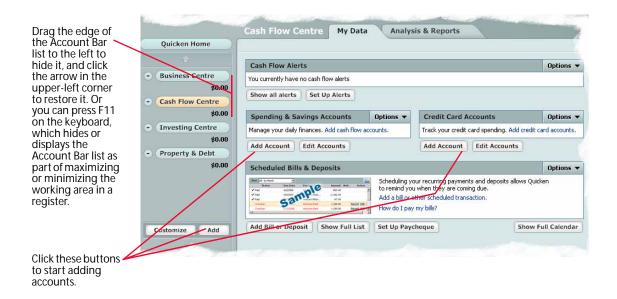

For many financial institutions, you can download all your account and transaction information at one time.

And setting up your accounts for transaction update doesn't save you time only when you add the accounts; you can keep your accounts current by going online and updating transactions rather than entering them into Quicken manually.

First, you'll learn how to add cash flow accounts online. If you would prefer to add your cash flow accounts without Online Banking access, you'll also learn how to do that.

Add cash flow accounts online

- 1 Choose Cash Flow menu > Go to Cash Flow Centre.
- 2 On the My Data tab, in the Spending & Savings Accounts snapshot, click Add Account.

3 Follow the on-screen instructions; click **Next** to move through the pages. Click **Help** if you need more

Use the following guidelines when you add the account. The order in which Quicken requests this information varies from one financial institution to another.

Identify your financial institution

If your financial institution is in the list that Quicken displays, select it. If it's not in the list, type its name. Be sure to correctly identify your financial institution. Quicken needs the official company name—not an abbreviation—to determine which services are offered by that institution.

Decide how to set up the account

If your financial institution supports Online Banking, Quicken helps you download your account data and balance information.

After you specify that you want to set up your accounts online, if Quicken displays Bank Card ID and password fields, you can probably add the account and transaction information for all your accounts from the financial institution at the same time. Enter the Bank Card ID and Online Banking Password if you have them, or follow the on-screen instructions to obtain them.

Note: Your Bank Card ID and password are defined by your financial institution. Your Bank Card ID may be an account number, bank card number or some other number assigned by your financial institution. It may also be the user name you use to log in to your financial institution's Web site.

After you specify that you want to add your accounts online, if Quicken displays your financial institution's Web site, you probably need to add the account and transaction information from the financial institution one account at a time. If you already have your login information, log in to your financial institution's Web site, navigate to your accounts, and select the option to download into Quicken. If you need to apply for IDs and passwords, follow the instructions on the Web site.

If your financial institution doesn't support Online Banking, or you do not want to download transactions from your financial institutions Web site, you can set up the account manually, as described in "Add cash flow accounts manually" on page 12.

Name your account

Enter a name for each account you want to add in Quicken. If you already added cash flow accounts in Quicken, you can match the account you downloaded from your participating financial institution to an existing Quicken account.

View the register

When Quicken finishes downloading your account information, it displays a summary window. Click the arrow to the left of the financial institution name to display all the accounts added for the financial institution, and then click the name of the account that you want to open.

This is where you'll review or enter future transactions to keep your account up-to-date, as described in "Update your cash flow accounts" on page 20.

But first, see "Assign categories" on page 13 to verify the categories Quicken has assigned to your transactions. If Quicken hasn't assigned a category because Quicken doesn't recognize the payee, assign a category and a payee.

If you have downloaded account information and transactions for more than one account at the same time, Quicken displays a flag to the left of each account name in the Account Bar list with downloaded information. Click the account name to open the account.

Add a credit card account online

If you have a credit card, use the following procedure to add the account and transactions to Quicken.

- 1 Choose Cash Flow menu > Go to Cash Flow Centre.
- 2 On the My Data tab, in the Credit Card Accounts snapshot, click Add Account.
- 3 Follow the on-screen instructions; click **Next** to move through the pages. Click **Help** if you need more information.

When Quicken finishes downloading your account information, Quicken displays a summary window. Close the window to go to the register.

This is where you'll update future transactions to keep your account up-to-date, as described in "Update your cash flow accounts" on page 20. But first, see "Assign categories" on page 13 for information about how to verify the categories Quicken has assigned to your transactions.

Add cash flow accounts manually

- 1 Choose Cash Flow menu > Go to Cash Flow Centre.
- 2 On the My Data tab, in the Spending & Savings Accounts snapshot, click Add Account.
- 3 In the Choose the type of banking account to create area, select Chequing, and click Next.

- 4 In the This account is held at the following institution field, type the name of your financial institution, and click Next.
 - If your financial institution is in the list that Quicken displays, select it. If it's not in the list, type its name. Be sure to correctly identify your financial institution. Quicken needs the official company name—not an abbreviation—to determine which services are offered by that institution.
- 5 Select Manual, and click Next.
- 6 In the Name this account field, type the name by which you want to refer to this account in Quicken, and click Next.
- 7 Select the currency of this account, and click **Next**. If you don't have an account in a different currency, then all the accounts you set up in Quicken will be in your home currency; that is, Canadian Dollar.
- 8 In the Statement Date field, enter the date from your bank statement.
- 9 In the Ending Balance field, enter the balance from your bank statement, and click Done. Quicken displays the register for the account so you can enter your transactions. See "Update your cash flow accounts" on page 20 to learn how.

Assign categories

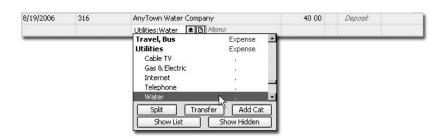

Make sure the correct category is assigned to all your transactions. For more information about categories, see "Learn how categories help manage your finances" on page 8.

You can assign single or multiple categories to a transaction.

Assign a single category to a transaction

In most cases, you assign the full amount of a transaction in the register to a single category.

- 1 Select the transaction you want to assign a category to, or change a category for.
- 2 In the Category field, select a category such as Utilities or, if Quicken has assigned a category for you, verify that the transaction includes the appropriate category. (If you don't see the category list, click the **Category** arrow.)

If you don't see a category that reflects the purpose of the transaction, you can create one. At the bottom of the category list, click Add Cat, and enter the information that Quicken requests. You can use the category for any transactions you add from now on.

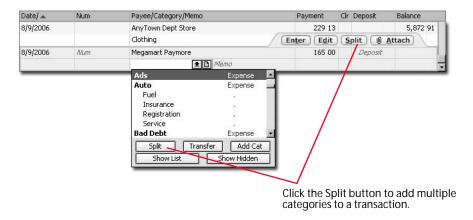

3 Click Enter to save the transaction.

When you click Enter to save a transaction, Quicken updates your data file on your computer's hard disk. That means that you don't have to save the file yourself. However, it's a good idea to back up the file to another location on a regular basis; you'll learn how in "Back up your data file" on page 27.

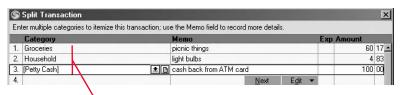

Assign multiple categories to a transaction

Sometimes you need to assign two or more categories to a single transaction. This is called a *split* transaction.

- 1 Select the transaction to which you want to assign two or more categories.
- 2 In the lower-right corner of the transaction, click Split.

Quicken displays the Split Transaction dialogue.

There are three categories assigned to one transaction. The [Petty Cash] line is a transfer to your cash account.

3 On each line, select a category, enter a memo (optional), and enter the amount to be assigned to the category. Repeat until you have split the transaction among all the appropriate categories and the sum of their amounts equals the transaction total.

You can also enter percentages instead of amounts. For example, to split a transaction 25/75 between two categories, type 25% in the Amount column of the first row instead of a dollar amount. When you move the pointer to the next line, Quicken calculates the percentage amount and recalculates the second split line to represent 75% of the total.

- 4 Click **OK** to save the split information.
- **5** Click **Enter** to save the transaction.

Split transactions are useful for breaking single transactions into several categories (for example, when you purchase both food and medicine at the grocery store). However, split transactions are not the ideal way to enter all the monthly transactions for a credit card. The best way to track credit card purchases is to create an account for the credit card and then enter each purchase as a separate transaction.

That's it! Now you're ready to review your accounts.

Review your cash flow accounts

You have several options when it comes to reviewing your cash flow accounts:

- The Quicken Home page helps you track and manage your short-term spending. By providing a quick overview of just the Quicken chequing accounts where you manage your regular deposits and expenses, Quicken can help you determine if you have enough money to cover your monthly bills.
- The Cash Flow Centre helps you track and manage your overall or long-term financial status. By displaying all of the chequing, savings, credit card, and cash accounts that you track in Quicken, you can get a better idea about how these accounts work with the rest of your assets and liabilities to impact your net worth.

Each option displays only the information that Quicken needs to accomplish its purpose. This means that the changes you make to Quicken will show up only where they make sense.

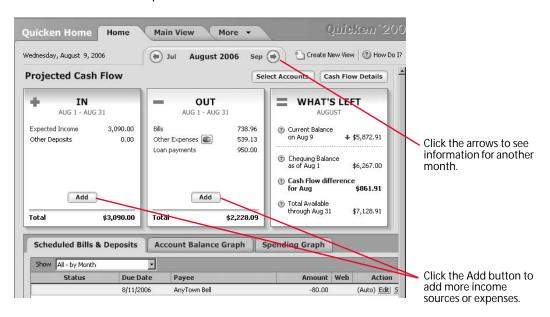

For example, let's say you have a credit card with a balance of \$2,000.00, and you make a regular monthly payment of \$150.00 from your chequing account toward the balance. The \$150.00 payment impacts the amount you have to spend in the short term, so Quicken displays this payment amount along with the rest of your payment obligations on the Quicken Home page. The \$2,000 credit card balance, on the other hand, has more of an impact on your overall or long-term financial status. If you have added a credit card to track your credit card transactions and balance, Quicken displays this information in the Cash Flow Centre.

The Quicken Home page

Choose Tools menu > Go to Quicken Home to open the Quicken Home page. If you are upgrading from a prior version of Quicken and have customized your Home page, you'll also need to click the Home tab.

The Home page includes the In/Out/What's Left snapshot as well as tools such as reports that provide insight into the data consolidated in the snapshot.

The In/Out/What's Left snapshot displays your income and expenses for the current month, but you can see projections of future months or information for past months by clicking the arrows on either side of the month above the snapshot.

The values and estimates in the In/Out/What's Left snapshot are made up primarily of scheduled transactions. Scheduled transactions are reminders of expected income and expenses that you have told Quicken about. For example, if you used Express Setup to set up your current Quicken data file, then the In area of the snapshot displays the paycheques and other deposits that you told Quicken about, while the Out area of the snapshot displays the bills and credit card payments that you told Quicken about.

Keep the Home page data current

The more complete your income and expense information is in Quicken, the more accurate and helpful the In/Out/What's Left snapshot will be in helping you project your cash flow from month to month.

Add a new income transaction

When you have a new source of income to track in Quicken, it's simple to add a new scheduled transaction to track the deposit.

In this section, you'll learn how to enter a scheduled transaction for a basic deposit. You'll learn the specifics for adding scheduled transactions for paycheques in Chapter 5, *Plan for tax time*.

- 1 Choose Tools menu > Go to Quicken Home. If you are upgrading from a previous version of Quicken and have customized your Home page, you'll also need to click the Home tab.
- 2 In the In/Out/What's Left snapshot, in the In area, click Add.
- 3 Click Yes I would like to schedule this transaction.
- 4 In the Payee list, enter who you receive the deposit from.
- 5 In the Category list, enter the appropriate income category.
- 6 In the Account to use field, enter the account that this income will be deposited into.
- 7 In the Method field, select Deposit.
- 8 In the Amount field, enter the amount of the deposit or the how Quicken should estimate the deposit amount.
- **9** In the Scheduling area of the dialogue, enter the day this deposit should start, whether you want to be reminded to enter the deposit into Quicken yourself or have Quicken enter it for you without prompting, the frequency of the deposit, and if and when the deposit should end. Click **Help** for more information.

10 Click OK.

Quicken adds the deposit amount to the Expected Income section of the In area of the In/Out/What's Left snapshot. Click Expected Income to see all the income Quicken is tracking for the month in question.

Add a new payment transaction

When you have a new bill to track in Quicken, such as the payment amount for a new credit card, it's just as easy to add a new scheduled transaction to track the payment.

In this section, you'll learn how to enter a scheduled transaction for a basic payment. You'll learn the specifics of adding and processing scheduled transactions for online payments in Chapter 3, *Set up Online Banking*.

- 1 Choose Tools menu > Go to Quicken Home. If you are upgrading from a previous version of Quicken and have customized your Home page, you'll also need to click the Home tab.
- 2 In the In/Out/What's Left snapshot, in the Out area, click Add.
- 3 Click Yes I would like to schedule this transaction.

- 4 In the Payee list, enter who you make the payment to.
- 5 In the Category field, select Credit Card Payment.
 - If you added a credit card payment to Quicken during Express Setup, Quicken adds the Credit Card Payment category for you. If this category is not already in the Category List at this point, Quicken will prompt you to add it at the end of this procedure.
- 6 In the Account to use field, select the account that this payment will be made from.
- 7 In the Method field, select Payment.
- 8 In the Amount field, enter the amount you expect to pay toward this credit card each month. You can change this amount when you enter the transaction in Quicken, so just enter an estimate if you're not sure.
- 9 In the Scheduling area of the dialogue, enter the day this payment should start, whether you want to be reminded to enter the payment into Quicken yourself or have Quicken enter it for you without prompting, the frequency of the payment, and if and when the payment should end.

10 Click OK.

Quicken adds the deposit amount to the Bills section of the Out area of the In/Out/What's Left snapshot. Click Bills to see all the expenses Quicken is tracking for the month in question.

11 If Quicken prompts you to add a Credit Card Payment category, click Yes, select Expense in the Type area, and click OK.

That's it! You've added new scheduled transactions for both income and expenses.

In the next chapter, you'll learn how to process scheduled transactions that are due. You'll also learn the remaining steps you must take to pay your bills.

Right now, though, let's see what tools are available to use on the scheduled transactions you've already entered.

Get answers about my spending

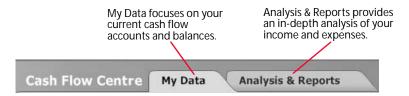

The Home page includes a number of reports and graphs that can help provide insight into the shortterm finances that you're tracking in the In/Out/What's Left snapshot:

- A number of reports in the In and Out areas of the In/Out/What's Left snapshot display the individual transactions or amounts that make the monthly totals in each area. To see these reports, click the blue link for the information you want to see.
- The Cash Flow Details report shows how you are managing your money. To see this report, click the blue link in the What's Left area of the In/Out/What's Left snapshot, or click Cash Flow Details above the What's Left area of the snapshot.
- The spending graphs display information about your expense allocation by category or payee. To see these graphs, click the Spending Graph tab at the bottom of the Home page.
- The Account Balance Graph displays information that can help you closely manage your money (for example, to make sure monthly expenses can be met). To see this report, click the Account Balance Graph tab at the bottom of the Home page.

The Cash Flow Centre

While the Quicken Home page shows you just the scheduled deposits and expenses for the cash flow accounts that you use to handle your monthly deposits and expenses, the Cash Flow Centre displays all of the cash flow accounts you track in Quicken. Having all of these accounts together in one place can give you a better idea about how they impact your net worth.

You'll find a different focus on each tab of the Cash Flow Centre. Choose Cash Flow menu > Go to Cash Flow Centre, and click the tab that has the information you want.

Keep the Cash Flow Centre data current

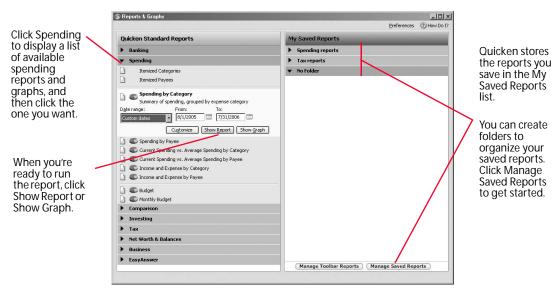

You can download transactions to keep the information on the My Data tab current. You'll learn how in "Update your cash flow accounts" on page 20. But first you'll learn about one of the easiest ways to get answers in Quicken—reports and graphs.

Get answers with Quicken reports and graphs

Quicken reports and graphs can show you how you are spending your money. When you assign categories to your transactions, Quicken can show your spending based on what you spend your money on. When you assign payees to your transactions, Quicken can show your spending based on where you spend your money.

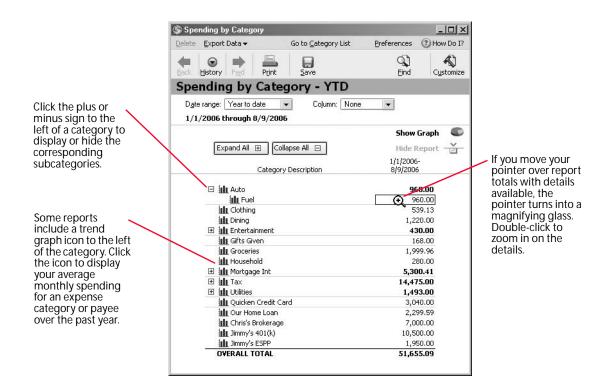

On page 8, you learned how to create a mini-report for a single category from the register. You can also create mini-reports for single payees from the register. However, when you want to look at data for several categories or payees at one time, use the Reports & Graphs Centre.

- 1 Choose Reports menu > Reports & Graphs Centre. Quicken displays the Reports & Graphs window.
- 2 In the Quicken Standard Reports list on the left, click **Spending**. Quicken displays the list of available spending reports and, when applicable, corresponding graphs.

- 3 Click Spending by Category to see what you are spending your money on, or click Spending by Payee to see where you are spending your money.
- 4 Select the date or dates you want the report or graph to include. (Optional)
- 5 Click Show Report or Show Graph.

Quicken displays a report or graph that reflects your expenses, based on the categories or payees you assigned when you entered transactions.

- 6 To print the report to paper or to a PDF, click Print. To export the report to another program like Excel or to the Clipboard, click Export Data. Click Help if you need more information. (Optional)
- 7 Click Save Report, type a unique name for the report, select or create the folder or area where you want to save the report, and click OK. (Optional)
 - The next time you want to open the saved report, you can do so from the My Saved Reports list on the right side of the Reports & Graphs window. To add a link for the report to the Quicken toolbar so you can access the report with a single click, right-click the Customize toolbar.
 - Spend some time experimenting with reports to get an idea of the different kinds of financial information that Quicken can provide. Try customizing a report to change how it is laid out or the scope of information it includes (saved reports retain their customized settings). Notice that when you run another report, the original report is minimized in the taskbar at the bottom of the screen so you can easily return to it at any time during your Quicken session.

Update your cash flow accounts

The easiest way to keep your accounts up-to-date is to download transactions from your financial institution. If you prefer, you can also enter new transactions manually.

Updating transactions

Updating transactions saves you time. Instead of entering transactions into Quicken manually, you update them when you go online from within Quicken. After you review them, Quicken adds them to the register for you.

If you added your cash flow accounts with Online Banking access, you're ready to update transactions whenever you want. If you added your accounts another way and want to start updating transactions, see Chapter 3 for information about how to get set up.

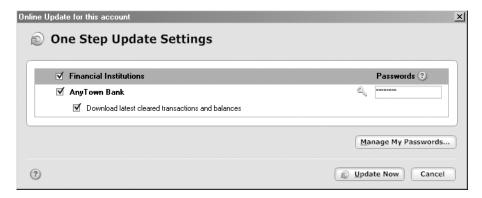

How you update transactions with your financial institution depends on the way it communicates with Quicken. If multiple connection methods are available, Quicken ensures the best experience by attempting the most direct connection methods first.

- When you click Update Transactions on the Download Transactions tab of the register you want to update, if Quicken displays Bank Card ID and password fields, you can connect directly to your financial institution through Quicken. See the next section, "Connect directly to your financial institution through Quicken."
- When you click Update Transactions on the Download Transactions tab of the register you want to update, if Quicken displays your financial institution's Web site, you must download transactions to Quicken from there. See "Connect to your financial institution through its Web site" on page 21.

If you do not have your accounts set up with Online Banking access, you'll have update your transactions manually. See "Manually enter transactions" on page 22 for information on how to do this.

Connect directly to your financial institution through Quicken

- 1 At the bottom of the register where you want to update information, click the **Downloaded** Transactions tab.
- 2 Click Update Transactions.
- 3 Select what you want to update for the financial institution.

- **4** Type the password for the financial institution you are updating transactions for.
- 5 Click Update Now. Quicken updates your transaction data.
- 6 Continue with "Compare updated transactions to your Quicken register" on page 21.

Connect to your financial institution through its Web site

- 1 At the bottom of the register where you want to update information, click **Downloaded Transactions**.
- Click Update Transactions. Quicken displays the login page of your financial institution's Web site.
- 3 Log in to your financial institution's Web site, navigate to the online account from which you want to download transactions, and select the option to download to Quicken.
- 4 If the File Download dialogue appears, specify that you want to open the file from its current location.
- 5 Match the online account with the correct account in Quicken if Quicken prompts you to do so, and then click Continue. Quicken updates your transactions.
- 6 Continue with the next section, "Compare updated transactions to your Quicken register."

Compare updated transactions to your Quicken register

After you update, Quicken displays the updated transactions at the bottom of the appropriate register.

Quicken compares the downloaded transactions to those you have already entered in the register; if any transactions are the same, Quicken labels them Match. If there is no match, Quicken labels them New. In most cases. Quicken correctly identifies a transaction based on the transaction amount, date, cheque number, and so on. Occasionally, you need to manually match or unmatch an updated transaction.

You have two options for accepting the downloaded transactions into your register: Accept All or Accept.

- Accept All is the fastest way to accept transactions into your register, and it is a good option if you download all the transactions for the account from your real-life Online Banking account.
- Accept is the most accurate way to accept transactions into the register because you review each one, and it is a good option if you enter some of the transactions into the account manually.

- 1 Decide how you want to accept transactions into your register:
 - Click Accept All in the lower-right corner of the Downloaded Transactions tab to accept all your downloaded transactions into your register at once.
 - Select each downloaded transaction in the register. Click Accept if Quicken has correctly identified it as a Match or New transaction. If Quicken has incorrectly identified the transaction, click **Help** for more information.

Sometimes downloaded transactions include extra information about a payee that is irrelevant to you. For example, the coffee shop near your office might be listed as AnyTown Coffeehouse 005 PLEASANTON 945. You can rename this payee to something shorter like AnyTown Coffeehouse. You can then assign this new name to several payees so that a transaction for a visit to the coffee shop near your home (AnyTown Coffeehouse 001 GILROY 950) displays the same payee. Quicken helps you rename payees as you accept transactions into your register. To rename payees at a later time, click Renaming Rules, and follow the on-screen instructions. Click Help if you need more information.

- 2 If Quicken assigns a category to the transaction, confirm that it is the correct category. If Quicken has not assigned a category because it does not recognize the payee, assign a category and a payee, For information about changing categories or adding them to transactions, see "Assign categories" on page 13.
- **3** Repeat steps 1 and 2 for each downloaded transaction.
- 4 Click Done.

After you're done accepting transactions, see "Reconcile your cash flow accounts" on page 25 for information about how to reconcile your account.

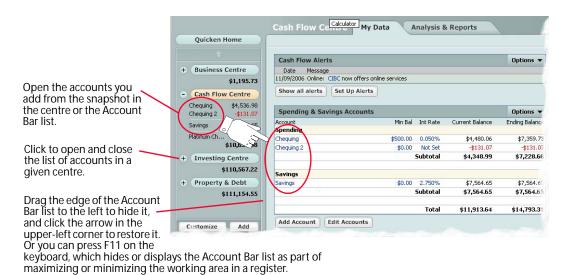

Manually enter transactions

The easiest way to keep your account up-to-date is with transaction update. If you have not set up transaction update, to keep your financial information current, you should manually enter all new transactions as they occur. That is, each time you write a cheque, make a deposit, or transfer funds, enter that information in Quicken. Use the following quidelines to help you decide which transactions to enter when you first begin using Quicken.

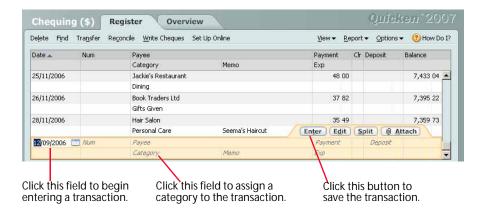

- If you reconciled your last bank statement (that is, if you balanced your chequebook), then enter all your outstanding transactions—those that weren't cleared on the statement and those that have taken place since you reconciled.
- If you didn't reconcile your last bank statement, enter only transactions that took place after the statement date that you used when you added the account. (If you enter any transactions that took place before you added the account, some of them might be accounted for twice—once in the amount you entered for the opening balance when you added the account, and once when you enter them again.)

Open the register

- 1 Choose Cash Flow menu > Go to Cash Flow Centre if your register isn't displayed.
- 2 On the My Data tab, in the Spending & Savings Accounts snapshot, click the account you want to open.

Quicken opens the register and selects an empty transaction.

Enter a payment transaction

- Select an empty transaction at the bottom of the register.
- 2 Enter a date, a cheque number, a payee such as AnyTown Water, and a payment amount. (You can use the mouse or the TAB key to move from one field of the transaction to the next.)
- In the Category field, select a category.
- In the Memo field, type a memo or note. (Optional)
- **5** Click **Enter** to save the transaction.

That's it! You've entered a payment transaction. Keep going to learn about entering other kinds of transactions.

Transfer funds to another Quicken account

After you have set up multiple Quicken accounts within the same data file, you can transfer funds between them. For example, if an annual bonus is deposited into your chequing account, you can transfer some percentage of the bonus to your savings account.

If you have not set up multiple accounts in Quicken, skip to the next section, "Enter a deposit."

- 1 Open the register for the account that you want to transfer money from.
- 2 On the toolbar, click Transfer.
- 3 Quicken displays the Record a Transfer between Quicken Accounts dialogue with the current account selected in the Transfer Money From field.
- 4 In the To Account field, select the account you are transferring money to.
- 5 In the Memo field, type a memo or description. (Optional)
- 6 In the Date field, enter the date of the transfer.
- 7 In the Amount field, enter the payment amount.
- 8 Click OK.

Quicken enters the transfer transaction in the register. The account you have made the transfer to appears in the Category field in [square brackets].

Enter a deposit

- 1 In the Date field, enter a date.
- 2 In the Num list, select Deposit.
- 3 In the Payee field, enter where the money is from (for example, Income Tax Refund).
- 4 In the **Deposit** field, enter the deposit amount.
- 5 In the Category field, select a category, or click Split to split the deposit among multiple categories.
- 6 In the Memo field, type a memo or note. (Optional)
- 7 Click Enter to save the transaction.

On an ongoing basis

Continue to enter all new transactions as they occur, either with transaction update or manually.

Also, reconcile your Quicken account each time you receive a new bank statement (see the next section, "Reconcile your cash flow accounts"). Reconciling ensures that your Quicken account accurately reflects all your banking activities. Reconciling is a great way to catch transactions that you forgot to enter or entered twice.

Note: If you didn't enter any existing transactions when you set up the account, you'll probably have several transactions to enter the first couple of times you reconcile your statements.

Reconcile your cash flow accounts

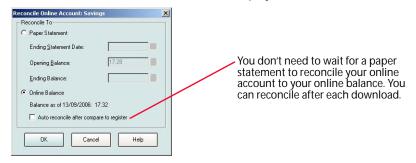

When you finish updating and accepting transactions into a Quicken account, or you receive a statement for an account that you are tracking in Quicken, reconcile your Quicken data. Reconciling ensures that your Quicken data is correct and can also help you discover any errors. You can reconcile almost any type of cash flow account, including chequing, savings, and credit card, but how you reconcile an account varies depending on whether you are reconciling to an online balance (online accounts only) or a paper statement.

Reconcile an account to an online balance

The fastest and easiest way to reconcile an account that you're updating transactions for is with your online balance.

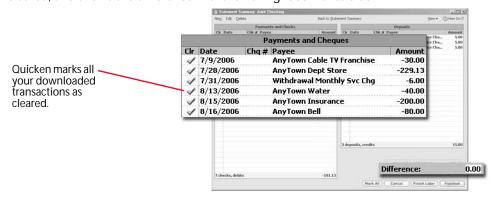

Note: After you decide to reconcile your account to an online balance, you should not switch to reconciling your account to a paper statement or it may appear that you are missing transactions or that your opening balance is incorrect.

- 1 Open the account register.
- 2 On the toolbar, click Reconcile. Quicken displays the Reconcile Online Account dialogue.

3 Select Online Balance and click OK.

Quicken displays the Statement Summary window, marks all your downloaded transactions as cleared, and shows the difference in the lower-right corner as 0.00.

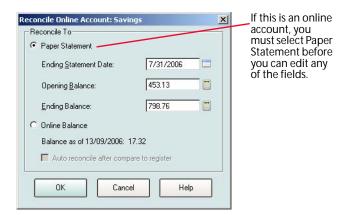

- 4 Click Finished.
 - Quicken marks each reconciled transaction with an R in the Quicken register's Clr column.
- 5 Click Yes to print a reconciliation report. (Optional)

Reconcile an account to a paper statement

When you receive a statement for an account that you are tracking in Quicken, reconcile the statement with your Quicken data. If you are updating transactions for the account, you must take care to account for transactions that occur after the ending statement date.

- 1 Open the account register.
- 2 On the toolbar, click Reconcile.

3 Use your bank statement to enter the requested information, except the opening balance, which Quicken calculates for you. Click **Help** if you need more information.

When you're finished reconciling, you can have Quicken make any needed adjustments in your register.

- Click OK.
 - If the account is online, Quicken marks all your updated transactions as cleared in the Statement Summary window. Click each transaction that occurred after your statement ending date to clear the check mark from the Statement Summary window.
 - If the account is not online, Quicken displays the Statement Summary window without any transactions selected. Select each transaction that appears on your statement to mark it as cleared in Quicken.

It's a good idea to check off each transaction on the paper statement as you go along, too. When you finish reconciling, cleared transactions will have an R in the Quicken register's Clr column.

- 5 If this is not an online account or it has been some time since your last update, you may need to add transactions that are on your statement but aren't listed in the Statement Summary window.
 - On the toolbar, click New to add transactions to the register.
 - In the register, click **Return to Reconcile** to return to the Statement Summary window.
- 6 Click Finished when the difference shown in the lower-right corner of the Statement Summary window is 0.00.

If the difference shown in the lower-right corner of the window is not 0.00, decide how you want to resolve the discrepancy. You may have forgotten to enter a transaction, or accidentally entered one twice. For example, perhaps your financial institution has recorded a service charge or dividend that you haven't entered into Quicken yet. For information about resolving reconciliation discrepancies, choose Help menu > Quicken Help, click the Index tab, and enter reconciling.

If the difference still is not 0.00, your best bet is to click Finished and let Quicken add an Adjust Balance transaction for you.

7 Click Yes to print a reconciliation report. (Optional)

To run a reconciliation report at a later time, choose Reports menu > Banking > Reconciliation.

Back up your data file

Quicken saves your data file on your hard disk each time you enter a new transaction. However, you should back up your Quicken data regularly so you always have a copy in case of a hardware failure or computer virus.

When you manually back up your Quicken data file with the following procedure, if you have attached images such as receipts or statements to your Quicken transactions or accounts, Quicken backs up these attachments with your data file only if there is enough room for all of them. If there is not enough room for all of your attachments, none of them are included in the backup.

You can back up your Quicken data file to removable drives, CDs, DVDs, and so on. Backing up to floppy disks is the least reliable form of data storage, and Intuit does not recommend that you use this method for your valuable financial data unless you have no other options.

- 1 Open the data file you want to back up if it isn't open already.
- 2 Choose File menu > Backup. Quicken displays the Quicken Backup dialogue.

If typing the path to your backup folder, you can use the following letter designations to indicate which drive you want to save your backup to.

- C:\ for your hard drive,
- D:\ for your CD-ROM drive, or
- · A:\ for your floppy drive.
- Enter the path to the directory or folder you want to save your backup file. If you do not know the path to your backup folder, click **Browse** to locate it.
 - Quicken backs up the file, then displays a message telling you that the backup was successful.

Next steps

If you're updating transactions in Quicken, you might be thinking how nice it would be to download them from your real-life bank accounts. If so, turn to the next chapter to get started!

3 Set up Online Banking

Online Banking in Quicken overview 30 Set up Online Banking with Quicken 32 Schedule payments 33 Next steps 34

Continue with this chapter if you have existing cash flow or investment accounts that you set up manually and want to start downloading transactions from your financial institution's Web site. If you are just adding cash flow or investment accounts, skip this chapter and see "Add your cash flow accounts" on page 9 or "Add your investment accounts" on page 36.

What you will need

You must connect to the Internet and register Quicken. (Choose Help menu > Register Quicken. If Register Quicken isn't on the Help menu, you've already registered.) You must also sign up for online account services with a participating financial institution, as described in "Set up Online Banking with Quicken" on page 32.

Online Banking in Quicken overview

Online Banking in Quicken give you convenient, day-and-night access to those accounts you have access to from your financial institution's Web site. The process of downloading your online account transactions in to Quicken is referred to as transaction update.

Transaction update helps you keep your accounts up-to-date, improves the accuracy of your record keeping, and simplifies reconciling your monthly statements. You can update transactions from your participating bank, brokerage, or other financial institution directly into Quicken and compare your financial institution's records to your own. Typically, when a cheque clears the bank, a credit card purchase is processed, or your broker executes a buy or sell order (Quicken XG only), you'll get the details the next time you update.

Why is using Online Banking with Quicken better than simply using my financial institution's Web site?

Many financial institutions let you bank or manage your investments online using your Web browser. However, using Quicken to manage your cash flow and investment accounts offers many additional benefits. Note that investment tracking is only available in Quicken XG.

Manage cash flow accounts online in Quicken

You may be able to see your balances, pay bills, and even transfer money between accounts with your financial institution's Web site. That said, generally you see only the limited number of transactions that have already cleared at your financial institution. By paying bills and entering transactions in Quicken, you know your actual ending balance, including the transactions that haven't cleared yet.

Quicken also offers these benefits:

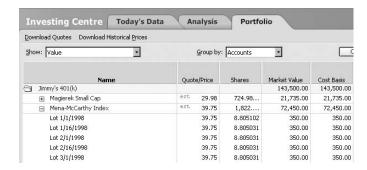

- Online Banking, alone, generally can't provide a complete picture of your finances unless all your accounts are at a single financial institution. Quicken can combine information from all your real-world accounts, so you can see the total effect on your cash flow and net worth. For more information about how many accounts to add, see "Decide how much detail you want to track" on page 2 and "Decide which accounts to track" on page 9.
- When you assign Quicken categories to your transactions, you get much more information out of your data than just the transaction history and cleared balance available from most financial institution Web sites. With no extra work, Quicken also gives you reports, graphs, long-term planners, alerts, reminders, and tax features that can save you time and help you make informed decisions that will affect your financial situation for years to come.
- You can use One Step Update to update your account information from several financial institutions at once. (This applies only to financial institutions that you can connect to directly from Quicken.)
- When you download transactions and accept them into your register, Quicken marks them as cleared. This makes it possible to balance your chequebook with just a few clicks—whether you reconcile the account with your financial institution's online records or the regular paper statement. For more information about reconciling accounts, see "Reconcile your cash flow accounts" on page 25, or choose Help menu > Quicken Help, click the Index tab, and enter reconciling.

Manage investing accounts online in Quicken

You may be able to see your holdings and recent transaction history, and even buy and sell securities on your financial institution's Web site. However, Web sites typically do not track history beyond a few months. If you enter those same transactions into Quicken, or better yet download them directly from your brokerage, you will have easy access to a level of detail not available elsewhere.

Quicken also offers these benefits:

- If you add a Quicken account for each of your real-world investment accounts, you can analyze all your investments in one place, no matter how many different financial institutions you use. The Investing Centre and the investing reports give you fundamentals, performance, history, and analysis. For more information about analyzing your investments, see "Track your portfolio's performance" on page 40.
- You can save time. Instead of entering transactions into Quicken manually, you update them when you go online. After you review them, Quicken adds them to the transaction list for you.
- If you add all the historical transactions for your investments and you keep your accounts up-to-date, Quicken adjusts the cost basis of your original purchase to account for every buy, sell, stock split, reinvested dividend, and so on. Quicken uses this information to calculate performance metrics. And when you sell, Quicken uses this information to calculate your capital gain or loss for tax reporting which is much easier than rummaging through old statements and transaction records and calculating cost basis manually. To see your individual purchases and cost basis at any time, open the Portfolio (choose Investing menu > Portfolio) and expand the security you want information about.

Do all financial institutions offer Online Banking with Quicken?

As the Web becomes more widely used, the number of financial institutions that offer Online Banking Services for banking and investing with Quicken continues to grow. For a complete list of financial institutions that offer online account services, choose Online menu > Participating Financial Institutions.

Set up Online Banking with Quicken

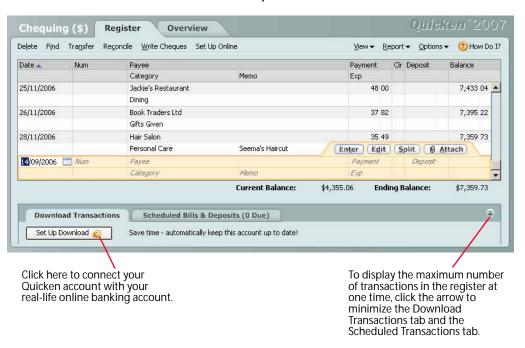

Continue with this section if you have existing cash flow or investment accounts which were set up manually in Quicken, and now you want to set them up to download transactions from your real-life Online Banking accounts. If you are just adding cash flow or investment accounts without any consideration for Online Banking, skip this chapter, and see "Add your cash flow accounts" on page 9 or "Add your investment accounts" on page 36.

Setting up Online Banking in Quicken requires two steps—signing up for Online Banking with your financial institution, then activating the account within Quicken.

Activate your accounts for Online Banking

You can activate your Quicken account and start using Online Banking as soon as you receive a Bank Card ID and password from your participating financial institution.

- Open the register or transaction list for the account that you want to set up for Online Banking.
- 2 On the Download Transactions tab, click Set Up Download.

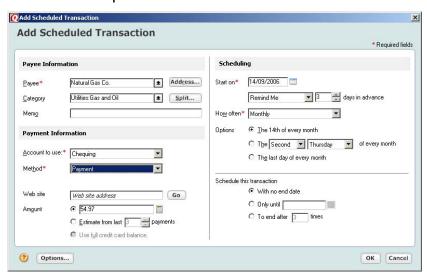

If Quicken requests your Bank Card ID and password, enter this information and follow the onscreen instructions; then continue with "Connect directly to your financial institution through Quicken" on page 20 for cash flow accounts or "Update investment accounts using transaction update (Online Banking)" on page 47 for investment accounts.

Schedule payments

With scheduled transactions, you can have Quicken remind you to enter a payment transaction in the register when a bill comes due, or have Quicken enter it in the register without prompting. After the payment transaction is in the register, you know it's time to send the payment.

Add scheduled transactions

- 1 Open the register you want to make the payment from.
- 2 Click the Scheduled Bills & Deposits tab at the bottom of the register.
- 3 Click Add Bill or Deposit.

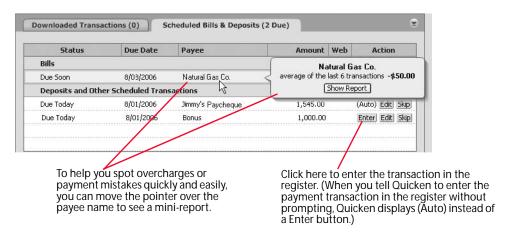

- 4 Enter the payee information.
 - In the Payee field, enter who receives this payment.
 - In the Category field, select the appropriate expense category.
- **5** Enter the payment information.
 - In the Account to use list, select the account you want to make the payment from.
 - In the Method list, select Payment.
 - In the Amount field, enter the payment amount.
- **6** Enter the scheduling information.
 - In the Start on field, enter the date you want the first payment made, and the action Quicken should take when the payment is due:
 - Remind me... reminds you when the payment is due. Reminders for scheduled payments are listed on the Scheduled Transactions tab at the bottom of the appropriate register.
 - Automatically Enter... enters the payment in your register automatically. After the payment is in the register, send the payment.
 - In the **How often** field, enter the frequency with which you want the transaction to recur.
 - In Options, enter the length of time you want this payment to remain scheduled in Quicken.
- 7 Click OK.

Quicken adds the payment instruction to the Scheduled Transaction List (choose Tools menu > Scheduled Transaction List).

Record scheduled transactions

If you told Quicken to remind you to record your payment when it's due, Quicken places a reminder about the payment on the Scheduled Transactions tab at the bottom of the appropriate register. Quicken also places a reminder for all scheduled transactions in the Cash Flow Centre and on the Quicken Home page. In this section, you'll learn how to respond to the reminder in the register.

- 1 Open the register you are making the payment from.
- 2 Click the Scheduled Bills & Deposits tab at the bottom of the register.
- **3** Locate the payment transaction.
- 4 At the right side of the window, click Enter.

Quicken displays the Enter Transaction dialogue.

- **5** Edit any individual elements of the payment. (Optional)
- 6 Click Enter Transaction. Quicken adds the payment transaction to your register.

4 Manage your investments with Quicken XG

Decide which investment accounts to track 36
Add your investment accounts 36
Track your portfolio's performance 40
Update your investment accounts 44
Add RRSP retirement accounts 49
Next steps 50

Before you start

Think about the types of investment accounts you want to track in Quicken, including brokerage RRSPs, mutual funds, and so on. This feature is available only in Quicken XG.

What you will need

If you want Quicken to help you add accounts by downloading account and transaction information, you should register Quicken. (Choose Help menu > Register Quicken. If you don't see Register Quicken on the Help menu, you've already registered.) If you want to add accounts manually, you will need the last statement you received for each investment and retirement account that you plan to track in Quicken. When you're ready to capture cost basis and capital gains information for an account, you will need all past and current statements for the account.

Decide which investment accounts to track

In this chapter you'll learn how to set up brokerage and RRSP accounts. For information about adding other types of investment accounts, choose Help menu > Quicken Help, click the Index tab, enter investment accounts, and select adding to Quicken. Note that the ability to track your investments is available only in Quicken XG.

The following table can help you decide which account types best suit your financial situation.

To track this real-world account	Add this Quicken account type
Investments such as stocks, including stock options and employee stock purchase shares, bonds, and mutual funds. (If you write cheques or use a debit card against this type of investment account, you can also track those transactions.)	Standard brokerage
RRSP and RESP retirement accounts.	RRSP or RESP
Mutual funds that meet the following requirements: (a) you purchase them directly from the mutual fund company, (b) they are tracked in accounts by themselves, and (c) the mutual fund company reinvests earnings and dividends in the same security, so the account does not carry a cash balance.	Single mutual fund

Add your investment accounts

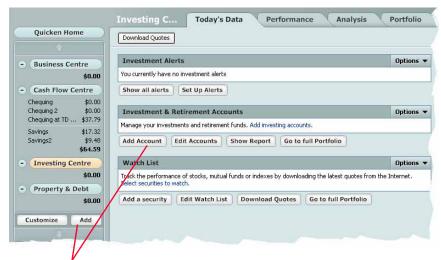

For many financial institutions, you can update all your account information and three to six months' worth of transaction information at one time. (Later, if you want to use the performance-tracking and tax-planning tools in Quicken, Quicken shows you how to add additional information such as cost basis.)

And setting up your accounts for transaction update doesn't save you time only when you add the accounts; you can keep your accounts current by going online and updating transactions rather than entering them into Quicken manually.

First you'll learn how to add brokerage accounts online. (If you can't use the following procedure to download RRSP accounts, see "Add RRSP retirement accounts" on page 49.) If you would prefer to add your brokerage accounts manually, you'll also learn how to do that.

Add brokerage accounts online

- 1 Choose Investing menu > Go to Investing Centre.
- 2 On the Today's Data tab, in the Investment & Retirement Accounts snapshot, click Add Account.

Click here to start adding accounts.

Follow the on-screen instructions; click **Next** to move through the pages. Click **Help** if you need more information.

Use the following guidelines when you add the account. The order in which Quicken requests this information varies from one financial institution to another.

Identify your financial institution

If your financial institution is in the list that Quicken displays, select it. If it's not in the list, type its name. Be sure to correctly identify your financial institution. Quicken needs the official company name—not an abbreviation—to determine which services are offered by that institution.

Decide how to set up the account

If your financial institution supports Online Banking for investment accounts, Quicken helps you download your account data and balance information.

- After you specify that you want to add your accounts online, if Quicken displays Bank Card ID and password fields, you can probably add the account and transaction information for all your accounts from the financial institution at the same time. Enter the Bank Card ID (or other such ID) and password if you have them, or follow the on-screen instructions to obtain them.
- After you specify that you want to add your accounts online, if Quicken displays your financial institution's Web site, you probably need to add the account and transaction information from the financial institution one account at a time. If you already have your login information, log in to your financial institution's Web site, navigate to your transactions, and select the option to download into Quicken. If you need to apply for a Bank Card ID and password, follow the on-screen instructions.

If your financial institution doesn't support Online Banking for investment accounts, you can set up the account manually, as described in "Add brokerage accounts manually" on page 38.

Name your account

Enter a name for each account you want to add to Quicken. If you already added investment accounts in Quicken, you can match the account you downloaded from your financial institution to an existing Quicken account.

Set your cash balance

When Quicken finishes downloading your account information, it displays a summary window. Click the arrow to the left of the financial institution name to display all the accounts added for the financial institution, and click the name of the account that you want to open. Then, in the Cash Balance Adjustment dialogue, verify the cash balance at your financial institution. If the Cash Balance Adjustment dialogue does not provide a cash balance, or the provided cash balance is incorrect, enter the cash balance from your brokerage's Web site for the day you are setting up the account, and then click Done.

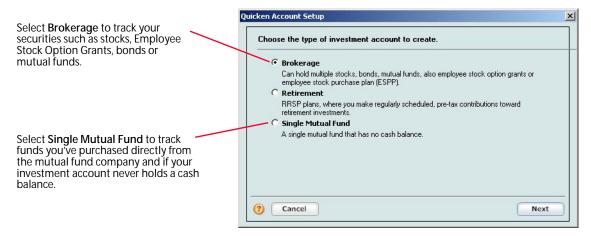

If you have downloaded account information and transactions for more than one account at the same time, Quicken displays a flag to the left of each account name in the Account Bar list with downloaded information. Click the account name to open the account.

That's it. You're done setting up accounts and ready to see how your investments are performing. See "Track your portfolio's performance" on page 40 for more information.

Add brokerage accounts manually

- Choose Investing menu > Go to Investing Centre.
- 2 On the Today's Data tab, in the Investment & Retirement Accounts snapshot, click Add Account.
- Select **Brokerage**, and click **Next**.

- 4 In the This account is held at the following institution field, enter the name of the financial institution that holds this investment account, and click Next.
 - If your financial institution is in the list that Quicken displays, select it. These are the financial institutions that Quicken can download investment transactions from.
 - If your financial institution is not in the list, type its name. Financial institutions that are not listed do not support Quicken's transaction update features. If this is the case, you'll have to update your investment account manually. For information about how to add your holdings manually, see "Update investment accounts manually (without Online Banking access)" on page 48.

- 5 If you were able to select your financial institution from the list, the next screen asks how you want to set up your account. Select Manual and click Next.
- 6 In the Name this account field, type the name by which you want to refer to this account in Quicken, and click Next.
- 7 Select the currency of this account, and click **Next**. If you don't have an account in a different currency, then all the accounts you set up in Quicken will be in your home currency; that is, Canadian Dollar.
- 8 Select whether this account is set up as a tax-deferred account, and click Next.
- 9 In the Statement Date field, enter the date you are using to set up holdings in this account, and click
 - If you are entering this information from a brokerage statement, use the statement ending date.
 - If you are entering this information from your brokerage's Web site, use the date that your information was posted (probably the date you accessed the site or the day before).
- 10 In the Cash Balance field, enter the cash balance for the account in the way your financial institution displays it, and click Next.
- 11 Identify the securities in the account, and click Next.
 - If you have Internet access, in the Ticker field, enter the ticker symbol for each security you want to download account details about. (If you do not know the ticker symbol for a security, click Ticker Symbol Lookup to connect to the Internet.)
 - If you do not have Internet access, in the Security Name field, type the name of each security you want to add to the account.
- 12 Type the total number of shares, and identify the security type for each security, and then click Next.

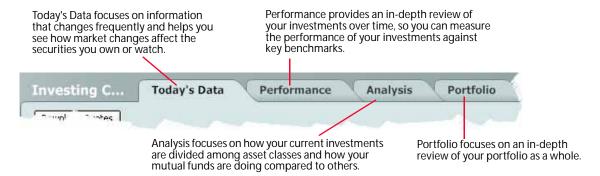

13 Click Done.

Now you're ready to add your holdings to the account. For information about how to update your holdings into Quicken, see "Update your investment accounts" on page 44. For information about how to add your holdings manually, see "Update investment accounts manually (without Online Banking access)" on page 48. Then you'll be ready to see how your investments are performing as described in the next section, "Track your portfolio's performance."

Track your portfolio's performance

Quicken makes it easy to track the performance of your investments in a way that emphasizes what's important to you. The Investing Centre provides a number of ways to view your investing and retirement accounts along with many useful tools to help you analyze and manage them.

You'll find a different focus on each tab of the Investing Centre. Choose Investing menu > Go to Investing Centre, and click the tab that has the information you want.

In this section, you'll learn how to use some of the performance and analysis tools in the Quicken Investing Centre. For example, you'll learn how to:

- Set up a watch list to track the securities you want to follow.
- Keep track of the average annual return for your investments.
- Determine the right asset allocation for you.
- Use the Portfolio to answer your top investment questions.
- Create reports that summarize your investment-related data.

Track the securities you want to follow

- 1 Choose Investing menu > Go to Investing Centre.
- Click the Today's Data tab.
- 3 In the Watch List snapshot, click Add a security.

4 Follow the on-screen instructions; click **Next** to move through the pages. Click **Help** if you need more information.

To track market indexes in the Watch List, click Edit Watch List, and select the Watch check box for each market index you want to display. If the market index you want to follow is not in the Security List, click Choose Market Indexes at the top of the Security List to add it. Quicken uses the market indexes in the Security List in the Growth of \$10,000 Comparison snapshot on the Performance tab. To learn more, click the What is Growth of 10,000 link at the bottom of the Growth of \$10,000 Comparison snapshot.

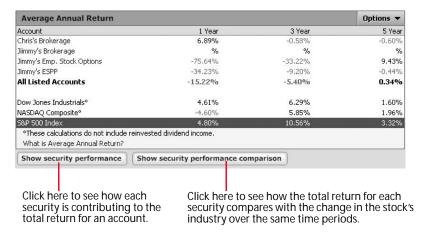

Track your average annual return

Your average annual return, often called the internal rate of return (IRR), is the cumulative total return on your accounts expressed as an annualized figure. It includes dividends, interest, and other payments you receive, plus increases and decreases in the market value of your securities. Generally, if the average annual return on an investment is 10 percent, that investment is performing as well as a bank account that pays 10 percent interest in the same time period.

For information about how Quicken calculates this and other investment performance measures, choose Help menu > Quicken Help, click the Index tab, and enter Average Annual Return.

You can view the average annual return for an individual account, all accounts, only investment accounts, or only retirement accounts.

- 1 Choose Investing menu > Go to Investing Centre.
- 2 Click the Performance tab.
- 3 On the Performance toolbar, select whether you want to view the average annual return for retirement accounts only, for all your investment accounts, or for a customized group of accounts. (Optional)
- 4 In the Average Annual Return snapshot, view the average annual return for your accounts. Quicken displays annualized figures for 1 year, 3 years, and 5 years.

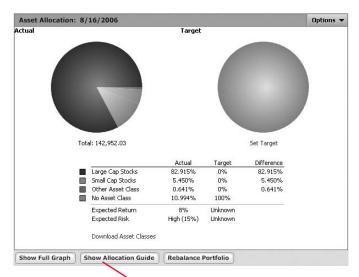

Set a target asset allocation

Your current asset allocation shows how your current investments are divided among asset classes. You can view the asset allocation for an individual account, all accounts, only investment accounts, or only retirement accounts.

In this section, you'll learn how Quicken can help you set up a target asset allocation. After you do, Quicken can help you determine if your current asset allocation is where it should be, and show you how to change it. For more information about asset allocation, choose Help menu > Quicken Help, click the Index tab, and enter assets (investment assets).

- 1 Choose Investing menu > Go to Investing Centre.
- 2 Click the Analysis tab.
- 3 On the Analysis toolbar, select whether you want to view asset allocation for retirement accounts only, for all your investment accounts, or for a customized group of accounts. (Optional)
- 4 In the Asset Allocation snapshot, click **Show Allocation Guide**.

Use the Allocation Guide to set your asset allocation target and learn about rebalancing your portfolio.

5 Read the on-screen instructions, and then click What should my asset allocation be on the left side of the window.

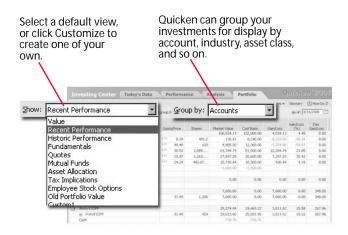

Use the Portfolio

The Portfolio provides multiple views that answer your top investment questions. You can analyze the holdings, performance, and price information for every security you own, across multiple investment accounts.

In this section, you'll learn how to select a portfolio view. For more information about the Portfolio, choose Help menu > Quicken Help, click the Index tab, and enter Portfolio, monitorina.

- 1 Choose Investing menu > Go to Investing Centre.
- 2 Click Portfolio.

Quicken displays a list of portfolio views to select from.

3 In the Show list, select the view you want Quicken to display. For example, for an in-depth look at the short-term performance of your securities, select Recent Performance. For an in-depth look at the long-term performance of your securities, select Historic Performance.

Quicken displays information pertinent to the view you selected. (Move your pointer over a column heading for an explanation.) If you want to see account information that is not displayed in the default views, click Customize to modify an existing view.

You can see some of the information in the portfolio views broken into smaller, graphical pieces in the Investing Centre. (In the Account Bar list, click Investing Centre, and then click the Performance tab). For example, the Average Annual Return snapshot on the Performance tab and the Historic Performance view in the Portfolio both include information about average annual return.

- 4 In the Group by list, select how you want your investments grouped. (Optional)
- 5 In the As of field, enter another date. (Optional)

If the Portfolio displays asterisks indicating that data is missing, and you want to correct the issue, see "Improve the accuracy of your investment data" on page 44. For more information about missing data, choose Help menu > Quicken Help, click the Index tab, enter transactions, and select placeholder.

Run investment-related reports and graphs

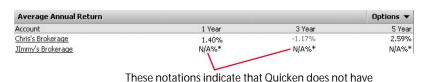

- 1 Choose Reports menu > Reports & Graphs Centre. Quicken displays the Reports & Graphs window.
- 2 In the Quicken Standard Reports list on the left, click **Investing**. Quicken displays the list of available investing reports.
- **3** Select the report you want to run.
- 4 In the date field, change the date or date range for the report. (Optional)
- 5 Click Show Report. If the report has a corresponding graph, you can click Show Graph instead. If the report displays asterisks indicating that data is missing, the bottom of the report includes a blue link called Placeholder Entries, followed by a blue link called Show me. Click Placeholder Entries to learn how to resolve placeholder entries. Click Show me to go to the place in Quicken where you can correct the issue. For information about when and why missing data is important, see "Improve the accuracy of your investment data" in the next section.
- 6 Click Customize to change the way the report is laid out or the scope of information it includes. Click Help if you need more information. (Optional)
- 7 You can either close the report or chose one of the following options:
 - Click Print to print the report to paper or to a PDF.
 - Click Save Report to save the report.
 - Click Export Data to export the report to another program or to the Clipboard. Click **Help** if you need more information.

Update your investment accounts

Now that you've seen the valuable performance and analysis tools in Quicken, you might be asking yourself what you can do to make your investment data more accurate and how can you can keep it current.

Improve the accuracy of your investment data

As you used some of the performance tools in Quicken, you may have noticed that some of the performance measures that you want to track include asterisks or/and other notations such as N/A indicating that placeholder entries for missing transactions are used in the calculations.

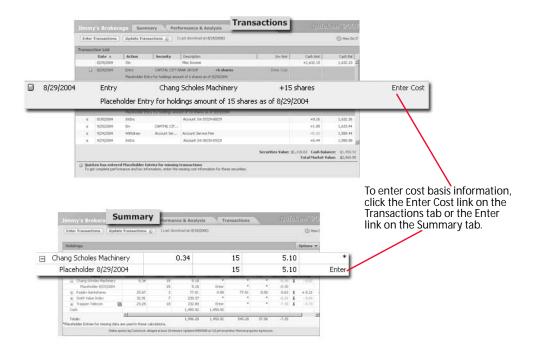

enough information to correctly calculate the value.

You can use placeholder entries to track holdings-only information in Quicken. They include the number of shares (along with the security name) that must be added to or subtracted from your Quicken account to make it agree with the number of shares and the account balance at your brokerage. If the current value of your holdings is all you want to track in Quicken, you can leave the placeholder entries as they are and skip the rest of this section. However, if you want to take advantage of the detailed performance analysis and tax tools in Quicken, such as those described in "Track your portfolio's performance" on page 40, continue reading.

The way to resolve all placeholder entries is to enter the date you bought the shares and cost basis information, which is the total amount you invest in a security you purchase. Cost basis includes commissions, fees, mutual fund loads, and all purchases (even reinvestments of dividends and capital gains distributions), minus the cost of any shares you have sold or given away.

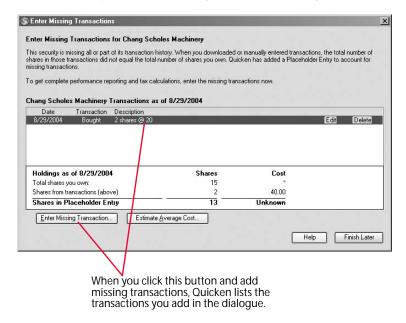

For each security that is missing transactions, Quicken adds an Enter Cost link to the Transactions tab and an Enter link to the Summary tab of the account where you hold that security. You can click either link to get started. As you enter the missing transactions that Quicken needs to calculate your cost basis, Quicken subtracts shares from the placeholder entry until it equals zero. Until you finish entering the complete transaction history, Quicken will identify those calculations and performance measures in the Portfolio, reports, and snapshots that are based on incomplete transaction information.

Quicken gives you two options for entering missing transactions, each with its own requirements.

- Enter Missing Transaction lets you add all the missing transactions needed to compare the historical performance of your securities over time, prepare accurate tax reports for both past and current holdings, and make informed tax decisions about your investments. (For example, you gain the ability to track securities grouped by common purchase prices and dates, which are important for calculating the tax rate that applies to your capital gains; tracking this information can save you a lot of time and effort when you file your taxes.) This option is the only way to take full advantage of the tax and investment tools in Quicken. You will need the date you first purchased each security, the price you paid for it, and all transactions that have occurred since the purchase date.
- Estimate Average Cost lets you improve the performance data for your current holdings. If you have held the account for many years or have a lot of transactions, this is a fast and easy way to get started until you can enter all your historical transactions. For each security, you will need the total cost of the entire holding or the average price you paid per share.
- Choose Investing menu > Go to Investing Centre.
- 2 On the Today's Data tab, in the Investment & Retirement Accounts snapshot, click your investment account.
- 3 Click the Transactions tab.

- 4 In the transaction list, select the placeholder entry you want to resolve.
- 5 In the Inv Amt field, click Enter Cost. Quicken displays the Enter Missing Transactions dialogue.

- **6** Identify the amount of information you want to enter:
 - Click Enter Missing Transaction to enter historical transactions. Use the Enter Transaction field to select each transaction you want to enter, and then enter the information that Quicken requests.
 - Click Estimate Average Cost to estimate the average price per share. Enter your estimate in the Cost or Price/Share field.

Keep your investment data current

The easiest way to keep your investment accounts up-to-date in Quicken is to download transactions from your brokerage using the transaction update feature (Online Banking). If you prefer or if your financial institution doesn't support transaction update at this time, you can also enter investment transactions manually.

If you set up your investment account to download transactions from your brokerage's Web site, you're ready to start updating transactions. See "Update investment accounts using transaction update (Online Banking)" on page 47 for instructions on how to do this.

If your investment accounts are not set up for Online Banking access, you must update your investment transactions manually. See "Update investment accounts manually (without Online Banking access)" on page 48 for instructions on how to do this.

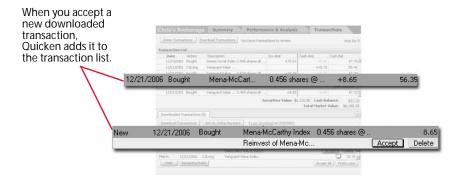

Update investment accounts using transaction update (Online Banking)

Once you have set up your investment accounts to download transactions using the transaction update feature, you can update your accounts with ease. Updating investment transactions using this method involves two steps: 1) going to your brokerage's Web site and downloading to Quicken, and 2) accepting the downloaded transactions into your transactions list.

- 1 At the bottom of the transaction list where you want to update information, click **Downloaded Transactions.**
 - Quicken displays the login page of your financial institution's Web site.
- 2 Log in to your financial institution's Web site, navigate to your transactions, and choose the option to download to Quicken.
- 3 If the File Download dialogue appears, specify that you want to open the file from its current location.
- 4 If Quicken prompts you to do so, match the online account with the correct account in Quicken, and then click Continue.
 - Quicken updates your transactions.
- 5 Continue with the next section, "Compare and accept downloaded transactions to Quicken data." If Quicken doesn't recognize the name of one or more downloaded securities, it displays the Matching Securities dialogue. Select Yes to match the security to an existing one in your Security List (shown at the top of the dialogue), or select No to add the security to the Security List.

Compare and accept downloaded transactions to Quicken data

After you update, Quicken displays the downloaded transactions at the bottom of the appropriate transaction list.

Quicken compares the downloaded transactions to ones you have already entered in the transaction list; if any transactions are the same, Quicken labels the downloaded transaction Match. If there is no match, Quicken labels the downloaded transaction New. If two transactions are almost a match but differ in some way, Quicken labels the downloaded transaction Near Match.

For example, Quicken labels transactions that have a difference of a few cents between the transaction cost in Quicken and your brokerage's data as Near Match transactions. (This difference can occur due to your brokerage's rules for rounding off decimals. For information about how Quicken rounds off decimals in calculations, choose Help menu > Quicken Help, click the Index tab, and enter round-off rules for investments.)

You have two options for accepting the downloaded transactions into your transaction list: Accept All or Accept. Accept All is the fastest way to accept transactions into your transaction list, and it is a good option if you download all the transactions for the account. Accept is the most accurate way to accept transactions into the transaction list because you review each one, and it is a good option if you enter some of the transactions into the account manually.

- Click Accept All in the lower-right corner of the Downloaded Transactions tab to accept all your downloaded transactions into your transaction list at once. Quicken displays a message if some transactions require manual resolution and guides you through the process.
- Select each downloaded transaction on the Downloaded Transactions tab. Click Accept if Quicken has correctly identified it as a New, Match, or Near Match transaction. Click Continue if you have transactions from other sources to accept. Click **Done** after you have accepted all the transactions. If Quicken has incorrectly identified the transaction, click Help for more information. You can also click Help for more information if Quicken prompts you to compare your brokerage's holdings to your holdings in Quicken or adjust your holdings amount.

That's it! You can see how your investments are doing with the tools described in "Track your portfolio's performance" on page 40.

Update investment accounts manually (without Online Banking access)

The easiest way to keep your investment account up-to-date is by downloading the transactions from your financial institution's Web site. If your financial institution doesn't support Online Banking accessibility with Quicken, you need to manually enter all new investment transactions as they occur.

How do I know if my financial institution supports Quicken's transaction update? When you set up your investment accounts in Quicken, you had to either select your financial institution's name from a dropdown list, or type its name because it wasn't listed. The financial institutions that are listed are the businesses that support Quicken's transaction update feature at the time we released Quicken 2007.

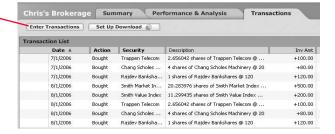

Quicken includes forms to help you enter each type of investment transaction, and the forms are a good way to quickly become familiar with the kind of information each type of investment transaction requires. After you are familiar with this information, you can also enter investment transactions directly in the transaction list.

Regardless of how you enter investment transactions into Quicken, Quicken assigns the appropriate investment categories to the transactions and tracks the tax consequences for you. For this reason, you do not want to change the investment categories in the Category List (choose Tools menu > Category List) that begin with an underscore (for example, _RRSPContrib).

To manually enter investment transactions with investment forms, follow these steps:

- 1 Choose Investing menu > Go to Investing Centre.
- 2 On the Today's Data tab, in the Investment & Retirement Accounts snapshot, click your investment account.
- 3 Click the Transactions or Summary tab.
- 4 Click Enter Transactions.

Click Enter Transactions to open a dialogue and select the action you want to perform.

- 5 In the Enter transaction list, select the action you want to perform. Investment transactions are at the top of the list, and cash transactions are at the bottom of the list.
- **6** Enter the information Quicken requests. If you are adding a bond, include the maturity date in the security name. This will help you distinguish it from other bonds in your portfolio and make it easy to match the information you download with the information in Quicken.
- 7 Click Enter/New to record additional transactions, and repeat steps 4 through 6. (Optional)
- 8 Click Enter/Done.

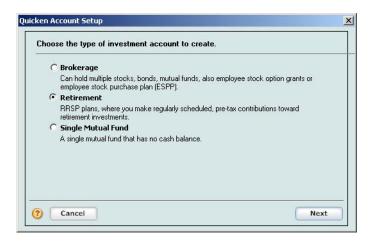

Add RRSP retirement accounts

If you want the most comprehensive picture of your net worth, or if you want help planning for your retirement, be sure to track your retirement accounts. In this section, you'll learn how to add one of the most common types of retirement accounts, an RRSP. For information about how to add other types of retirement accounts, choose Help menu > Quicken Help, click the Index tab, enter investment accounts, and select adding to Quicken.

Most financial institutions let you add RRSP accounts online. If your financial institution is one of them, you can add your RRSP account just as you would a brokerage account, as described in "Add brokerage accounts online" on page 37. Otherwise, use the following procedure.

- 1 Get the RRSP statements that you want to enter into Quicken. If you're not concerned with historical information, you could start with your most recent statement and enter just your current holdings during set up.
 - If you want to include historical information for net worth purposes, choose the appropriate option:
 - If your financial institution *does not* provide share balance information and transaction history, then you must decide on a starting date before you add the account. (Typically, you would get all your statements and enter holdings information in chronological order, starting with the oldest statement.) After you've added the account, you cannot enter statement information that occurred before the date of the earliest statement you use to set up the account.
 - If your financial institution does provide share balance information and transaction history, then you can set up the account with just your most recent statement and enter your historical information at a later point, as described in "Improve the accuracy of your investment data" on page 44.
- 2 Choose Investing menu > Go to Investing Centre.
- 3 On the Today's Data tab, in the Investment & Retirement Accounts snapshot, click Add Account.
- 4 In the This account is held at the following institution field, enter the name of the financial institution that holds this investment account.
 - If your financial institution is in the list that Quicken displays, select it. If it's not in the list, type its name. Be sure to correctly identify your financial institution. Quicken needs the official company name—not an abbreviation—to determine which services are offered by that institution.

5 Select Retirement, and click Next.

- 6 Follow the on-screen instructions; click Next to move through the pages. Click Help if you need more information.
 - When you finish adding the account, Quicken displays the Summary tab for the account.
- 7 Click the Transactions tab to add cost basis information, as described in "Improve the accuracy of your investment data" on page 44. (Optional)
 - For more information about resolving placeholder transactions for RRSPs, choose Help menu > Quicken Help, click the Index tab, enter transactions, and select placeholder.

Get help for tax time 52
Track your paycheque 52
Track your tax-deductible expenses 56
Use the Tax Planner 58
Run tax-related reports 59
Next steps 60

Before you start

At a minimum, you should complete Chapter 2, *Manage your income and expenses*, being sure to add the account into which you deposit your paycheque.

What you will need

You will need a recent paycheque stub.

Get help for tax time

Quicken includes several tools to help you track your tax-related income and expenses. The Tax Centre provides the most commonly used tools along with a summary of your tax-related data and reminders about upcoming tax-related dates.

Tracking tax-related information in Quicken can be useful throughout the year, long before April 30. For example, Quicken can use your data to help you determine if you're having too much or too little deducted from your paycheque. You can also review your deductible expenses on an ongoing basis.

The more tax-related information you track in Quicken, the easier your life can be when tax time does roll around. If you plan to use QuickTax® to prepare your taxes, you'll find information in the Tax Centre to help you import your Quicken data directly into the QuickTax software. Even if you don't use taxpreparation software, you can still use Quicken to print reports that consolidate a year's worth of information into a few pages; copy the figures onto your tax forms, and your work is practically complete.

In this chapter, you'll learn how to use some of the tax tools in the Quicken Tax Centre. In particular, you'll learn how to:

- Add a paycheque that tracks your gross income and all the deductions taken out of each paycheque.
- Keep track of tax-deductible expenses.
- Use the Tax Planner to estimate your tax liability and investigate different "What if" scenarios.
- Create reports that summarize your tax-related data.

Track your paycheque

While you could choose to enter the net amount of your paycheque as a deposit in your register, if you do so, you loose all the details about the paycheque, such as amounts added to your RRSP or deducted for federal taxes. Therefore, Quicken provides a special paycheque feature that tracks gross amounts, deductions, and net amounts for each paycheque. This simplifies a great deal of your tax planning in Quicken.

Even if you initially added only the net amount of your paycheque in Quicken (as would be the case for any paycheques added during Express Setup), you can still use the paycheque feature to add deduction information now.

The paycheque feature also works if your paycheque varies from one pay period to the next. Just adjust the details as necessary when you enter the paycheque transaction.

Add a paycheque

When you use a recent paycheque stub to add the financial details from your paycheque, Quicken remembers these details each time you enter a paycheque into the register.

You receive the maximum benefit from the tax tools in Quicken (such as the Tax Planner) by setting up your paycheque at the beginning of the tax year.

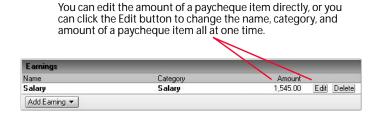

Use this procedure to add a new paycheque to Quicken. If you simply want to add deduction information to a paycheque added to Quicken (for example, during Express Setup), then continue with the next section, "Adjust a paycheque."

- 1 Choose Tax menu > Go to Tax Centre.
- 2 In the Taxable Income YTD snapshot, click Add Paycheque. Quicken displays the Paycheque Setup wizard. (If Quicken displays the Manage Paycheques dialogue instead, click New to open the Paycheque Setup wizard.)

- 3 In the Paycheque Setup wizard, click **Next**.
- 4 Follow the on-screen instructions; click **Next** to move through the pages. Click **Help** if you need more information.

Use the following guidelines as you add the information about your paycheque:

- Select the account into which you want to deposit the paycheque.
- Enter the date of the first deposit, when Quicken should remind you to enter your paycheques into the account register, and how often you are paid. Click the double arrows (>>) to the left of Scheduling to display the required fields if necessary.
- Click Edit on the right side of the appropriate area to enter the figures for gross pay and deductions from your recent paycheque stub in the Setup Paycheque dialogue, or to change the name, category, or amount of a paycheque item.

- Click the Add button in the lower-left corner of the appropriate area to add a paycheque item to the Setup Paycheque dialogue. For example, to add items for bonuses, profit sharing, or vacation, holiday, or sick pay, click Add Earning; to add items for retirement plans, flexible spending accounts, or medical insurance, click Add Pre-Tax Deduction; to add items for employee stock purchase plan deductions or loan repayments, click Add After-Tax Deduction.
- 5 In the Manage Paycheques dialogue, click **Done** when you have finished adding your paycheque.

Adjust a paycheque

If you get a raise or change jobs, or if other activities permanently affect your paycheque, future paycheques should reflect this new information.

If you used Express Setup to add your paycheque to Quicken, you can also use this procedure to add deduction information.

- 1 Choose Tax menu > Go to Tax Centre.
- 2 In the Taxable Income YTD snapshot, click **Edit Paycheque**.
- 3 In the Manage Paycheques dialogue, select your paycheque.
- 4 Click Edit, make any necessary changes, and click Done.
 - If you want to change when Quicken reminds you to enter your paycheque into the account register or how often you are paid, click the double arrows (>>) to the left of Scheduling.
 - If this paycheque was added to Quicken as a net deposit (as would be the case if you added the paycheque during Express Setup), you may need to click Track Deductions to display the fields where you enter your deductions.

Click **Help** if you need more information.

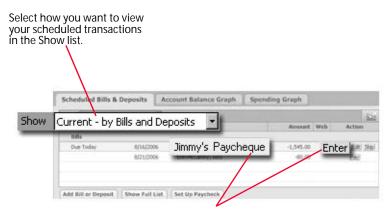

5 In the Manage Paycheques dialogue, click Done when you have finished adjusting your paycheque.

Enter a paycheque into the register

If you told Quicken to remind you to enter your paycheque into the register when it's due, Quicken places a reminder about the paycheque on the Scheduled Transactions tab at the bottom of the appropriate register. Quicken also places a reminder for all scheduled transactions in the Cash Flow Centre and on the Quicken Home page. In this section, you'll learn how to enter the transaction that you've told Quicken to remind you is due on the Quicken Home page.

- 1 Get your most recent paycheque (or your paycheque stub if you have direct deposit).
- 2 Choose Tools menu > Go to Quicken Home. If you are upgrading from a prior version of Quicken and have customized your Home page, you'll also need to click the Home tab.
- 3 Click the Scheduled Bills & Deposits tab.
- 4 On the Scheduled Bills & Deposits toolbar, in the Show list, select whether you want to view all your bills and deposits or just the current ones. You can also view your transactions by month or status. (Optional)
- **5** Locate the paycheque transaction.

6 At the right side of the window, click **Enter**.

Click Enter to record the transaction in the register.

- 7 Edit the paycheque amount. (Optional)
- 8 Click Enter to record the paycheque transaction in your register.

If you are using the Quicken Home page to help manage your spending, you should add scheduled transactions for other transactions that occur at regular intervals, such as bill payments, deposits, and account transfers. For more information about the Quicken Home page, see "The Quicken Home page" on page 15. For more information about scheduled transactions, choose Help menu > Quicken Help, click the Index tab, enter scheduled transactions, and select overview of.

Track your tax-deductible expenses

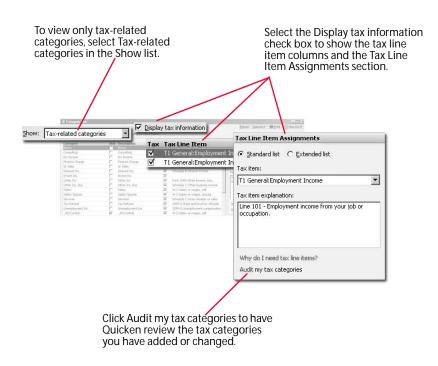

Quicken can link categories to specific lines on a tax form. (Categories are discussed in detail in "Assign categories" on page 13.) Linking categories to tax forms automates the process of tracking income and tax-related expenses.

Use standard tax-related categories

Quicken links the most common tax-deductible categories and subcategories to tax forms. If you added a paycheque to Quicken in the previous section, you may have noticed that your income was assigned to the Salary category and that deductions were assigned to categories and subcategories such as Tax:Federal and Tax:Medicare.

To see a full list of standard tax-related categories in Quicken, open the Category List (choose Tax menu > Tax Line Item Assignment).

Tax-related categories have a check mark in the Tax column, and the Tax Line Item column indicates the tax form and line item associated with the category. If a category doesn't have the appropriate tax form line item associated with it, you can assign one with the Tax Line Item Assignment on the right side of the Category List. (If you don't see the Tax column or the Tax Line Item Assignment, select the Display tax information check box.)

Audit or review tax-related categories

If you have added your own tax-related categories or changed a standard category's tax line item, Quicken can help you make sure that you have assigned the correct tax line item.

- 1 Choose Tax menu > Go to Tax Centre.
- 2 In Tools, click Tax Line Item Assignment. Quicken displays the Category List, with the Tax Line Item Assignment area on the right side of the window.
- 3 Click Audit my tax categories.

Quicken checks all your categories and lists the categories that meet the following criteria:

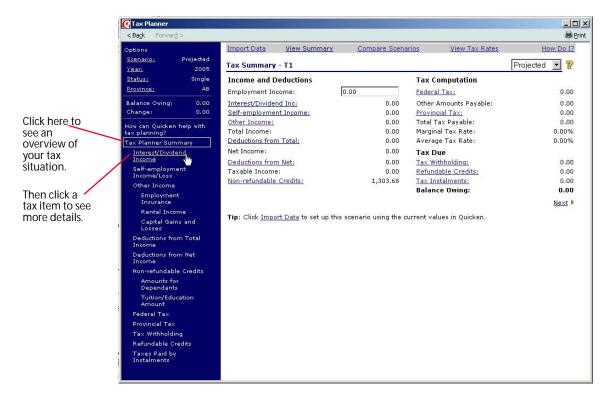

- Standard Categories are not linked to their original tax line items, or are linked to incorrect tax line items.
- User-defined Categories may need to be linked to different tax line items.
- 4 Select the appropriate action for each category Quicken displays.
 - Click Change to edit a category, make the necessary changes, and click OK. Click Help for more information.
 - Click **Ignore** to leave the category unchanged.

Use the Tax Planner

Use the Tax Planner to prepare for the inevitable. After you add a paycheque to Quicken and assign tax categories to a few tax-related expenses, you already have a wealth of tax-related data at your fingertips. The Tax Planner can use your Quicken data to help you anticipate the current year's tax liability. You can then adjust your payroll exemptions if necessary.

Note: To work effectively, the Tax Planner needs year-to-date information for your gross pay and deductions. If you did not add your paycheque at the beginning of the tax year and did not add year-todate information when you added your paycheque to Quicken, add this information as you go along. If you need assistance, click the question mark in the upper-right corner of the Tax Planner window.

- 1 Choose Tax menu > Go to Tax Centre.
- 2 In Tools, click Tax Planner.
- 3 On the left side of the Tax Planner window, click How can Quicken help with Tax planning?
- 4 Read the on-screen instructions, and then click Let's get started on the left side of the Tax Planner window.

Run tax-related reports

You don't have to wait until tax time to review your tax information. In fact, you probably won't want to. Use the included tax reports to help you keep an eye on your tax information throughout the year.

- 1 Choose Reports menu > Reports & Graphs Centre. Quicken displays the Reports & Graphs window.
- 2 In the Quicken Standard Reports list on the left, click Tax. Quicken displays the list of available tax reports:
 - Capital Gains displays short-term and long-term sales that are subject to capital gains tax. If the report displays asterisks indicating that data is missing, the bottom of the report includes a blue link called Placeholder Entries, followed by a blue link called Show me. Click Placeholder Entries to learn how to resolve placeholder entries. Click Show me to go to the place in Quicken where you can correct the issue. For information about when and why missing data is important, see "Improve the accuracy of your investment data" on page 44.
 - Tax Schedule displays tax-related transactions subtotalled by tax form line item. If you plan to export tax information to tax software, this is the report to use.
 - Tax Summary displays tax-related transactions subtotalled by category.

To learn how to add these reports and other valuable tools in minutes, choose Help menu > Add More Investing & Tax Tools. Or navigate to the report in the Reports & Graphs Centre, and click Unlock Report.

- 3 In the date fields, change the date or date range for the report. (Optional)
- 4 Click Show Report.
- 5 Click Customize to change the way the report is laid out or the scope of information it includes. Click Help if you need more information. (Optional)
- **6** You can either close the report or chose one of the following options:
 - Click **Print** to print the report to paper or to a PDF.
 - Click Save Report to save the report.
 - Click Export Data to export the report to another program or to the Clipboard. Click Help if you need more information.

Next steps

If you want to use Quicken to help you plan or manage your taxes in more detail, try the Capital Gains Estimator. It helps you plan security sales so you can maximize after-tax yields. To open it, in the Tax Centre, in Tools, click Capital Gains Estimator.

6 Determine your net worth

Put it all together 62
Track your home value and associated loan 62
Track a vehicle value and associated loan 63
Add other asset and liability accounts 64
Analyze your net worth 64
Next steps 66

Before you start

To get a complete picture of your net worth, you should enter all the financial information discussed in the previous chapters before you continue with this chapter. If you have completed the previous chapters, most of your work here is done.

What you will need

You will need information about the purchase price and value of your assets (home, vehicle, and so on) as well as information about any loans that might be associated with them.

Put it all together

Although using Quicken as described in the previous chapters can bring a great deal of order to your finances, you still don't have a complete picture of your financial situation. In this chapter, you'll learn how to use the tools and information in the Property & Debt Centre to track the assets (what you own) and liabilities (what you owe) not reflected in your bank balance or stock portfolio (Quicken XG only).

The more financial information you provide to Quicken, the more Quicken can help you understand and improve your overall financial health. When you add asset and liability accounts, you're increasing the power of Quicken to incorporate all your financial data into a single, clear picture of where you stand and where you can go.

In this chapter, you'll learn how to add the following types of accounts:

- An asset account for a home you own or are buying, with an associated liability account if you're paying a mortgage
- An asset account for a vehicle you own or are buying, with an associated liability account if you're paying off a vehicle loan
- An asset account for other property you own, such as a stamp collection or work of art
- A liability account for other loans or debt, such as a student loan

Track your home value and associated loan

If you own a home, you can use Quicken to track its value, along with the mortgage that may be associated with it. Quicken calculates the value of your equity and tracks the interest you pay each year and the remaining loan balance.

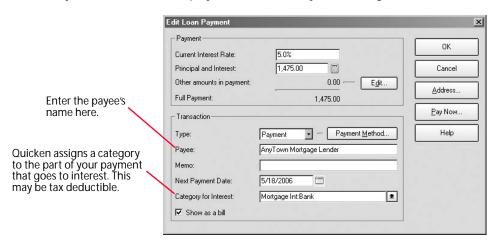

When you add a mortgage account, Quicken adds both an asset account for the positive value you have in your home, and a liability account for the value of your home loan.

- 1 If you have the last statement you received for the mortgage account you plan to add, get it now. You can use the statement to enter the most recent values, such as balance remaining on the mortgage, while you're adding your account.
- 2 Choose Property & Debt menu > Go to Property & Debt Centre.
- 3 In the Property & Debt Accounts snapshot, click Add Account.
- 4 Select House (with or without Mortgage), and click Next.
- 5 In the Name this account field, type the name by which you want to refer to this account in Quicken, and click Next.
- **6** Select the currency of this account, and click **Next**.
- 7 Follow the on-screen instructions; click **Next** to move through the pages. Click **Help** if you need more information.

Note: When you add the account, enter both the purchase price and the estimated current market value if you know it. Quicken enters the purchase price as the opening balance and adds an adjustment transaction in the house account register to reflect the current market value. This way you can track your equity. As the home's value changes over time, you can enter additional transactions to keep the equity value current.

If you told Quicken that you have a mortgage on the house, Quicken adds two accounts: one for the positive value of the house (a house account) and one for the negative value of the loan (a house loan account). Quicken then displays the Edit Loan wizard.

8 Enter the requested information about your home loan. When you finish, Quicken displays the Edit Loan Payment dialogue.

9 Enter information about your regular loan payment, and then click OK.

Track a vehicle value and associated loan

The steps for tracking a vehicle's value and loan are almost identical to those for adding a house and mortgage account. When you add a vehicle loan account, Quicken adds both an asset and a liability account.

- 1 If you have your last statement for the vehicle loan, get it now.
- 2 Choose Property & Debt menu > Go to Property & Debt Centre.
- 3 In the Property & Debt Accounts snapshot, click Add Account.
- 4 Select Vehicle (with or without Loan), and click Next. Quicken displays the Asset Account Setup wizard for tracking a vehicle.
- 5 Follow the on-screen instructions; click **Next** to move through the pages. Click **Help** if you need more information.
 - If you told Quicken that you have a vehicle loan, Quicken adds two accounts: one for the positive value of the vehicle (a vehicle account) and one for the negative value of the loan (a vehicle loan account). Quicken then displays the Edit Loan wizard.
- **6** Enter the requested information about your vehicle loan. Click **Help** if you need assistance.

If you have assigned Auto categories to your transactions, you can see a summary of your auto expenses whenever you're in the Property & Debt Centre. In the Auto Expenses snapshot, click Show Auto Expense Report.

Add other asset and liability accounts

You can track the value of anything that you own (asset) or owe (liability) in Quicken. Following the same procedures as in the previous sections, add any asset or liability accounts that you want Quicken to include when evaluating your financial situation. For each account, enter a value that you think is a good estimate of the total value of your assets or liabilities. If you don't want to track your assets or liabilities in great detail, you can group them together in a single asset or liability account.

Note: When you add a house or vehicle account, Quicken prompts you to add the associated liability account and loan (if any). To get the most complete picture of your financial health, don't forget to add a liability account and loan for any other assets you owe money on. You can add liability and loan accounts in the Property & Debt Centre (choose Property & Debt menu > Go to Property & Debt Centre). You can add them in either order since after you add one of them, Quicken prompts you to add the other. To add a liability account, in the Property & Debt Accounts snapshot, click Add Account. To add a loan, in the Loan Accounts Summary snapshot, click Add Loan.

Analyze your net worth

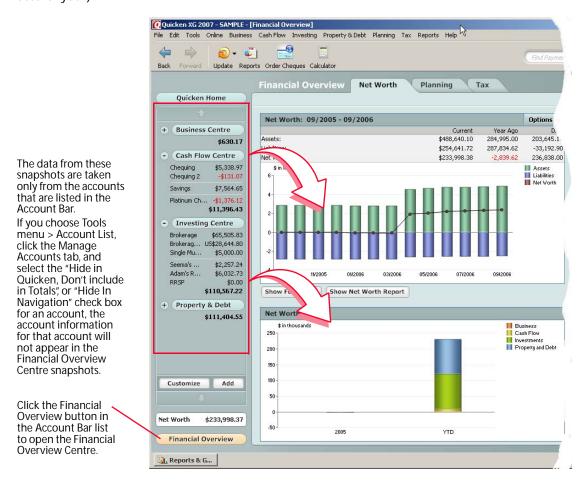

Now that Quicken has more information about your finances, you can learn more about the value of your net worth.

If you have selected the Don't Include in Totals check box for any account in the Account List (choose Tools menu > Account List), Quicken modifies the totals in the Account Bar list and the totals in the account snapshots in the centres, including the Financial Overview Centre described below. However, selecting this check box will not affect the totals in the net worth report described on page 66. For more information, choose Help menu > Quicken Help, click the Index tab, and enter net worth.

Use the Financial Overview Centre

This centre shows changes to your assets and liabilities, including cash flow and investment accounts, over time. It also shows you the percentage of your finances in each type of account.

1 At the bottom of the Account Bar list, click Financial Overview. Quicken displays the Financial Overview Centre. (You must have Quicken Deluxe or Quicken Premier. To learn how to add this and other valuable tools in minutes, choose Help menu > Which Quicken is best for you?)

2 Click the Net Worth tab.

Run a net worth report

This report shows your net worth as of a specified date. Quicken calculates your net worth by adding the balances of your chequing, savings, cash, asset, and investment accounts (your assets), and then subtracting from that total the balances of your credit or charge card and liability accounts (your liabilities). Note that investment accounts are only available in Quicken XG.

- 1 Choose Reports menu > Reports & Graphs Centre. Quicken displays the Reports & Graphs window.
- 2 In the Quicken Standard Reports list on the left, click the arrow to the left of Net Worth & Balances.
- 3 Select Net Worth.
- 4 In the Report Balance as of field, change the date for the report. (Optional)
- 5 Click Show Report or Show Graph. Quicken displays a report or graph that shows the value of all your assets and liabilities.

If you want to exclude certain information from your net worth report, click Customize, make any desired changes, and then click OK. For example, if you want a report that excludes non-liquid assets, such as your home, click Customize, and clear the asset and liability accounts for your home on the Accounts tab.

Next steps

As you can see, using Quicken gives you insight into where your money is going so you can plan for your future. From here on, it's up to you to keep your Quicken data up-to-date, and to review it periodically to make sure that you are on track to reach your financial goals.
